

The show "Salon Kuiperdomingos / A prospective get-together" is inspired by the French Salon of the 18th & 19th century, a meeting place of a network of 'connoisseurs' and artists, where the art...ists were showing their latest works and where discussions took place. Inspired by this idea we create a Salon filled with 2 dimensional works covering the walls of the art space. A basic idea inspiring the initiators of Kuiperdomingos Projects, is the idea of the 'network'. We invited artists and curators from our direct network to participate and let each of them invite another artist. With this idea in mind we create a visual tree of works of an artistic community currently roaming around creative Berlin and those that are part of our extended network.

Each artist has 1 m² at his/her disposal and is free to show any bidimensional work. The Salon is the inspiration and ideas coming into our mind are 'the medium of painting, portraiture, nude paintings, woman with mirror, woman in the bathroom, still life, landscape, interior and exterior spaces, ornament and geometry'.
