BUNNYS SPORTS

The Fictionary Players
(Alexandre A.R.Costa, Jorge Fernando dos Santos, Miguel Seabra)

The project explores a whole universe of paradoxical relations between fiction and reality. Doubt is an element of permanent significance in this action. The viewer has the opportunity of feeding the hope of creating a relationship between satirical, ridiculous and erotic signs.

The action evolves during three moments: the search of fictitious identities, a very unique "game" immune to outside influences, and an outcome unknown even to the characters...

At some point there may be noticed a proximity to some aesthetic references that mark much of the universe of artists, such as Matthew Barney, Julie Atlas Muz or David Lynch. This may promise a baffling "show", directed especially to an audience familiar with this kind of creative universe...
